

PS7. Applying Causal Methods

Organised by Leonard Henckel (University of Copenhagen)

Session overview

Causal inference promises the tantalizing possibility of reliably drawing causal conclusions from observational data. It generally requires strong and hard to verify assumptions, however, which makes it difficult to apply correctly in practice. In this session, we will dive into the unique promises and difficulties of applying causal methodology in a variety of research areas.

Speakers

- Helene Rytgaard, DTU
- Julian Schüssler, AU
- Arne Henningsen, KU
- Søren Mogensen, Lund University

Programme

13:45 Helene Rytgaard
14:15 Julian Schüssler
14:45 Arne Henningsen
15:15 Søren Mogensen
